master CHEMICAL

Our philosophy

Master Chemical Corporation's founder Clyde Sluhan invented coolants for industrial machining in 1951. Since then our company, which is family owned and operated, has grown into a global corporation, but has never lost sight of his long-range vision and principles.

Committed to developing and producing quality products, we at Master Chemical take pride in our tradition of excellence and our focus on integrity. We are true to the spirit of innovation, on which our company was founded, as we develop new products that respond to ever-changing industry needs.

We look for business partnerships with manufacturers that share similar values as our own.

*Steve Sigmon President & CEO
Master Chemical Corporation*

Our shared values

We, like you, work within the Japanese kaizen philosophy of continual improvement. We strive to improve not merely our products, but also focus on the processes of our customer to enhance your production, improve your finished product, streamline human effort, and reduce unnecessary waste.

From start to flawless finish, we understand and share your values, challenges and concerns. Whether yours is the automotive, aerospace, energy, medical, general machining, or construction industry, we have specific metalworking and cleaning solutions for the production of premium, reliable, and repeatable parts.

In the highly competitive manufacturing arena, we forge a relationship with our customers, as you do with yours, based on honor and integrity. Our fluids perform to expectation, assuring you meet your own high standards and critical tolerances— and those of your customers— part after part, day after day.

A business partnership

Our nearby Asian facilities underscore our commitment to your operations and assure just in time product delivery. We offer you highly-trained experts and lab services to assist you with production concerns, product selection, troubleshooting, and problem solving. Because we want to make your business our business.

A Global Perspective, An Asia-Pacific Commitment

Leaders in metalworking fluids

TRIM® offers high-performance emulsions, semisynthetics, synthetics, and neat oils specifically suited to your manufacturing parameters. You'll experience better finished parts and increased repeatability, a safer employee work environment, longer machine tool life and extended sump life, improved cleanliness.

With TRIM coolants you'll experience

- > significantly reduced fluid and tool costs
- > less employee health problems
- > reduced downtime and labor
- > very low foam, 'friendly' residue
- > fewer disposal issues
- > less waste, better return on resources

Products to clean and protect

Master STAGES™ cleaners, and corrosion inhibitors can keep your facility running at peak performance and environmentally compliant. Whatever your specific production concern— health and safety, disposal costs, rust on parts— there's a Master STAGES product sure to be the right solution for the job at the right price.

In-process washing compounds for

- > spray, immersion, or ultrasonic parts cleaners
- > multi-metal operations
- > metalworking fluid removal
- > built-in/water-based rust protection
- > vibratory finishing
- > less disposal concerns

Fluid recycling equipment

Master Chemical invented XYBEX® fluid recycling systems for recycling coolants and cleaners. As properly maintained coolant can last almost indefinitely, a fluid management program using XYBEX equipment eliminates waste and can literally pay for itself. Maximize productivity and minimize waste with XYBEX.

With XYBEX, you'll see

- > coolants lasting almost indefinitely
- > significantly reduced material costs
- > huge savings on disposal expense
- > measurably reduced downtime
- > increased productivity
- > less waste that translates to substantial cost savings
