

Master Fluid
SOLUTIONS®

Leaders in innovation and technology

The pioneers of metalworking coolants, Master Fluid Solutions, has lead the industry with integrity, innovation, expertise, technology, and environmental awareness for more than 65 years.

With 40,000 tier-one, -two, -three and OEM customers worldwide, our highly trained, global sales and tech-support experts serve North and South American, European, and Asian-Pacific manufacturers.

The solutions you need

Our in-depth mastery of metalworking manufacturing allows us to target your needs, concerns, and expectations with solutions to:

- > improve your production and performance
- > ensure product repeatability and eliminate costly rejects
- > keep you environmentally code-compliant
- > reduce overall costs and boost your profitability

Meeting the highest standards

- > our **products have earned more than 70 aerospace approvals** to meet or exceed the most stringent aerospace specifications
- > our **quality assurance and continuous improvement techniques** ensure products of the highest quality and repeatability
- > our **ISO 9001:2008 certification** for design, manufacturing, and servicing of metalworking fluids, cleaning compounds, and related products assure we meet and exceed industry standards

In-depth market knowledge

Servicing global manufacturers in our target areas, we make it our business to know and respond to these major markets:

- > aerospace
- > automotive
- > industrial parts production
- > agriculture/construction
- > energy exploration/production

Business Partnership

We earn and value your trust based on:

- > our corporate culture of integrity, focus, and commitment
- > our worldwide team of skilled sales and tech service professionals
- > our quality, consistent, innovation solutions
- > our commitment to the environment

The hard facts

After a data-gathering visit to your production facilities, we produce a customized, detailed, facts-based analysis to give you the hard facts to help you make informed production decisions pertaining to:

- > cost analysis
- > quality control
- > production and cost optimization
- > opportunities for improvement
- > trouble-shooting specific concerns

Increase production with TRIM®

- > significantly reduce fluid/tool costs
- > reduce downtime and labor
- > lower disposal costs
- > ensure code compliance
- > excellent operator acceptance
- > a safer workplace for employees
- > boost your bottom line

Clean and protect with Master STAGES™

- > spray/immersion/ultrasonic parts cleaning
- > multi-metal operations
- > metalworking fluid removal
- > built-in/water-based RP's/cleaners
- > vibratory finishing
- > reduce your disposal costs

Significantly reduce costs with XYBEX®

- > dramatically reduce coolant usage
- > reduce downtime/repairs/labor
- > greatly reduce/eliminate disposal fees

ISO 9001

Our data can help drive your facts-based decisions.
