

EXCEL MANUFACTURING OF SEYMOUR, INDIANA

TRIM® MicroSol® 690XT Boosted Their Bottom Line

Here's how TRIM® MicroSol® 690XT semisynthetic outperformed expectations for Excel Manufacturing

MicroSol 690XT saves time and money

Brad Watts, Makino a81 operator, is thrilled with their change to premium semisynthetic MicroSol 690XT. After their three-month trial, Excel Manufacturing changed over their whole shop to MicroSol 690XT. They had been using quality TRIM® MicroSol® 585XT and TRIM® MicroSol® 685lf in their shop, and now they were looking for one high-performance solution that could do it all.

They find MicroSol 690XT has provided much better lubricity with low foam and much less coolant consumption. They had been running their coolant with a high refractometer reading in an effort to address their problem with excessive foam. Now they run MicroSol 690XT at half the refractometer reading with no foaming issues at all.

Brad Watts attests, "Even with the low-foam MicroSol 685lf, foam would build up in the reserve wait area so high that it coated the drum and caused the machine to go into a low-coolant false alarm. With the MicroSol 690XT, foam barely builds up, then breaks down quickly without a problem. MicroSol 690XT is going to save us a lot of money...and I'm really excited we got it shop-wide."

Longer tool life and less foam with MicroSol 690XT

Maintenance supervisor Curt Metcalf tells about their successful three-month testing of MicroSol 690XT. "We tested it on aluminum, cast iron, and ductal iron. It solved a reaming problem we were having on aluminum, and we saw improved tool life. Operators like the low chemical smell and the parts are much cleaner."

To resolve their foaming issues Curt says "we first tried the MicroSol 685lf. Even though it is a low-foam product, we still had foam issues, so we went to MicroSol 585XT, which helped with the foaming but doesn't have as good of tool life. The MicroSol 690XT has even better low-foam properties than the 685lf and better tool life than the 585XT."

Boost your profits and production with MicroSol 690XT!
