

THE SOLUTION FOR MACHINING CAST IRON

# TRIM<sup>®</sup> MICROSOL<sup>®</sup> 455

LOW-FOAM FERROUS SEMISYNTHETIC

*Energize your cast iron machining with TRIM<sup>®</sup> MicroSol<sup>®</sup> 455*

TRIM<sup>®</sup> MicroSol<sup>®</sup> 455 low-foam semisynthetic, microemulsion coolant is optimized for high-volume cast iron, ferrous, and some aluminum and nonferrous metalworking operations. MicroSol 455 prevents leaching of elemental iron and eliminates clinkering and oxidation of ferrous micro fines.

Delivering extended sump life, machine-friendly MicroSol 455 provides excellent, cost-effective cooling. Make a difference to your bottom line with MicroSol 455.

*Choose TRIM<sup>®</sup> MicroSol<sup>®</sup> 455:*

- > low foaming for today's demanding high-pressure, high-volume applications
- > also for machining some aluminum alloys and nonferrous metals
- > provides superior corrosion inhibition on cast iron and eliminates "hot chip" and clinkering problems
- > keeps machines very clean while leaving a soft fluid film for ease of cleaning and reduced maintenance
- > requires no special disposal or recycling

*Use MicroSol 455 especially for:*

- > *Applications:* high-pressure, high-volume, machining, and slab milling
- > *Metals:* cast iron and ferrous metals
- > *Industries:* automotive and general industry
- > *MicroSol 455 is free of:* boron, chlorine, DEA, and sulfur
