

E206

For an excellent finish, longer tool life and longer sump life, use TRIM® E206.

TRIM E206.

- High-lubricity emulsion coolant for wide range of operations: gear hobbing; heavy-duty broaching; production, surface and centerless grinding
- Rejects tramp oil – for increased sump life without costly additives
- Compatible with all ferrous and nonferrous metals
- Highly stable, fine emulsion – reduces carryoff, delivers fluid to point-of-cut
- Extreme-pressure additives effectively control built-up edge (BUE)
- Soft fluid film prevents sticky ways, chucks and fixtures
- Easily recycled or disposed of with conventional methods and equipment
- Coolant residue easily removed with water or aqueous cleaners

E206. Long lasting performance.

- An Asian manufacturer of brake master cylinders uses diamond cutters for their reaming operations. They've used E206 for several years and attest to great tool life, excellent parts finish AND sump life of over a year!
