

C270

## The single, premium coolant that grinds it all: **TRIM® C270.**

### **TRIM C270.**

- For grinding the “exotic materials” in turbines and turbine parts
- Approved for use by General Electric, Pratt Whitney, and Rolls Royce
- Superior filtration at high flux rates – for optimal surface finishes and surface integrity, longer wheel life, fewer dressing cycles
- Very low foam, low mist – reduces operating and maintenance costs
- Clean, resoluble residue on parts and machines facilitates cleaning
- Extremely low carryoff – lowers operating costs
- Exceptional sump life and tramp oil rejection – reduces maintenance
- Clean, low mist means a cleaner, healthier workplace

### **C270. When it comes to coolants, it's the only way to fly.**

- A world leader in aircraft engine manufacturing has used C270 since 1999 for ALL their viper and creep feed grinding operations and recommend their worldwide subcontractors do the same.
