

Meeting the Challenges
of the HVAC&R Compressor Industry with

Master STAGES™ CLEAN COM31

Washing Compound

MasterSTAGES™ CLEAN COM31. Specifically designed for refrigeration compressors, high-performance CLEAN COM31 is the cleaner just right for you.

Because cleanliness is crucial to the production and operation of refrigeration compressors, we developed a cleaner specific to your needs. Super concentrated, very high-performance CLEAN COM31 is made for spray and ultrasonic cleaning of light- and medium-oil and water-based coolants. Stand behind your product with cleaner, more reliable parts with CLEAN COM31.

Choose CLEAN COM31:

- > very concentrated, high performance
- > for washing ferrous metals and parts such as cast iron and alloy steel
- > for short-term rust protection between processes
- > washes off easily to leave no undesirable residual film; meets the residue-free requirement for compressor parts
- > excellent cleaning at ultrasonic washing elevated temperatures for light-oil and water-based coolants
