

Meeting the Challenges
of the HVAC&R Compressor Industry with

TRIM[®] MicroSol[®] 585XT

Extended-life, Nonchlorinated Semisynthetic

Boost your production with TRIM[®] MicroSol[®] 585XT, the high-performance, nonchlorinated coolant that will pump up your bottom line.

Achieve precision parts, longer tool life, dramatically extended sump life, code compliance, and greater profitability with the highly lubricious, microemulsion semisynthetic coolant – MicroSol 585XT. Providing excellent cooling and mechanical lubricity, MicroSol 585XT delivers what other brands only promise – dependability and longevity.

Choose MicroSol 585XT:

- > exceptional sump life without tank-side biocides or fungicides
- > multi-metal versatility – cast iron, steels, titanium and aluminum alloys, copper, most plastics, and composites
- > high performance without chlorinated EP additives, nitrites, triazines, or phenols
- > low foaming in high-pressure, high-volume applications
- > superior corrosion inhibition on all ferrous and nonferrous metals
- > keeps machines clean, leaving soft fluid film for easy cleaning
- > easily recycled/disposed of with conventional methods/equipment
