

TRIM[®] TC 234

Recycling Additive

GENERAL DESCRIPTION

TRIM[®] TC 234 is a mixture of chemicals to replace the materials that may be preferentially depleted in some (cationic) synthetic and semisynthetic products. Some of these products have such low carryoff that normal make-up will not replace all of the materials which are depleted over long periods of use. When TC 234 is used as part of a comprehensive recycling or coolant management program, it will replace and/or enhance both the ferrous and nonferrous corrosion inhibition systems of coolant working solutions.

APPLICATION GUIDELINES

- TC 234 should only be used as recommended by your Master Chemical Authorized Distributor, or your District Sales Manager.
- TC 234 is normally used in (cationic) synthetic and semisynthetic products only, like TRIM[®] C115, TRIM[®] C270, and TRIM[®] SC230.
- The typical add rate for this product is 0.05% (500 ppm) or as directed by the Master Chemical Corporation.

HEALTH & SAFETY

See the most recent SDS at 2trim.us/s/?i=1107-en-US-US.

TECHNICAL ASSISTANCE

- For additional product applications information including performance optimization, please contact your Master Chemical Authorized Distributor at 2trim.us/distributors.php your District Sales Manager, the Tech Line at 1-800-537-3365, or visit our web site at www.masterchemical.com.
- Packaging: North America – 1-gallon container, 5-gallon pail, 54-gallon drum.
- Europe/Asia - 20-litre pail, 204-litre drum.

PHYSICAL PROPERTIES (TYPICAL DATA)

Form	Liquid	Flash Point	Nonflammable (CC)
Color	Amber	Specific Gravity (H ₂ O=1)	1.126
Odor.....	Amine	pH of Concentrate (as a range)	7.5-8.5
