

Master Chemical Corporation Celebrated 50 Years

On November 13, 2001, Master Chemical Corporation celebrated 50 years in business.

A dedication ceremony took place at 2:30 PM on November 13, 2001. During this ceremony a bust of the founders Clyde and Marian Sluhan was unveiled. The entire corporation and many past associates and vendors were invited. There were a few guest speakers and a special historical video about the founding of Master Chemical Corporation was presented.

Since 1963, headquarters and the principal manufacturing facility for the corporation have been located in Perrysburg Ohio. Over these past 38 years we have welded a special relationship with Perrysburg and its citizens. Our decision to headquarter here has proven mutually beneficial for both the corporation and the city. Today, Master Chemical pays regional taxes in excess of \$250,000 and some 20 employees are residents of either the city or township.

By the mid 1990's Master Chemicals sales exceeded 40 million dollars. The corporation sells its TRIM® brand cutting and grinding fluids, EDM OILS, Synthetics, Semi-synthetics, Emulsions, Cleaners and Washing compounds, Straight oils, Tapping Compounds, Honing Oils, Corrosion Inhibitors and Additives and TC's through one hundred and fifty distributors to thousands of customers, worldwide. These include firms that produce components for jet engines, suspension parts for the automotive industry, cast iron, steel and aluminum frames for electric motors, firearms, pumps, agricultural equipment and aircraft.
