

Ref: MAST\165

Date of issue: June 2006

LOW-COST 'UNIVERSAL' FLUID

Master Chemical has extended its European CHIP 3 classification family of cutting and grinding fluid concentrates. The addition is TRIM® E708 whose consistent performance belies its low cost. It is low-foaming and extremely hard water tolerant. Also as this a very effective biocidal package, it promises an exceptionally long sump life.

This TRIM® product is the ideal universal fluid for multi-metal job shops. It can be used to machine a wide range of ferrous, non-ferrous and non-metallic materials.

In common with other additions to the Master Chemical fluid range, TRIM® E708 is classified as non-hazardous in accordance with CHIP 3 regulations. It contains no nitrites, secondary amines or phenolics. Neither does the formula contain sulphur or chlorine as an EP additive.

Naturally, TRIM® E708 is formulated for recycling. Good tramp oil separation is assured without significant change in emulsion characteristics.
