Jim J. Mills Joins Master Chemical Corporation as North America Technical Service Manager

Perrysburg, Ohio, June 11, 2008—Master Chemical Corporation has named Jim J. Mills to the position of North America Technical Service Manager, responsible for overseeing all North American Technical Service Department operations. As North America Technical Service Manager, Mr. Mills will interface with Master Chemical customers and identified prospects. Also, he will work closely with Master Chemical's Europe, India, and Asia Technical Service groups. "We are pleased to announce that Jim Mills will lead our Technical Service Team," said Vice President, Research and Development Michael C. Weismiller, PhD. "He has impressive credentials and will also be a valuable addition to our cross-functional New Product Development Team," he stated.

According to Dr. Weismiller, Mr. Mills will travel frequently to Master Chemical customers and obtain the "Voice of the Customer". He will share this information with our New Product Development teams, which are continuously working to find ways to develop innovative new products and techniques to improve customer productivity. Mr. Mills will also continue to increase the Technical Lab's efficiency by cross-training staff, upgrading equipment, and improving laboratory methods—including our premier distributor methods and test kits.

Mr. Mills holds a Bachelor of Science in Chemistry from Ohio University and a Masters in Business Administration from Otterbein College. Prior to joining Master Chemical, Mr. Mills was employed by Houghton Fluidcare Inc., as complex manager for the Western Tennessee, Dana, Norandal, and Toyota Bodine manufacturing facilities.

About Master Chemical Corporation

Master Chemical Corporation was founded on November 13, 1951. Since then, working closely with the worldwide metalworking community, Master Chemical Corporation has developed and marketed a full line of specialty cutting and grinding fluids, cutting oils, concentrated washing and cleaning compounds, and rust preventives all under the TRIM[®] Brand trademark. These products are both environmentally sound and when used in conjunction with Master Chemical's XYBEX[®] Coolant Recycling and Filtration Systems, are the most durable and stable products available anywhere today. Master Chemical has always been committed to the safety of the people who use our products, the protection of our planet and the environment we live in, and the overall impact on our customers' profitability. For further information please contact a Distributor near you (http://www.masterchemical.com/na_en/distributors/index.php), visit www.masterchemical.com, or call us at 419-874-7902.
