Master Fluid Solutions Announces TRIM® MicroSol® 455 to Energize Your Cast Iron Machining

Abstract summary: TRIM® MicroSol® 455 low-foam semisynthetic, microemulsion coolant is optimized for high-volume cast iron, ferrous, and some aluminum and nonferrous metalworking operations.

Perrysburg, Ohio, September 10, 2018 – Master Fluid Solutions announces TRIM® MicroSol® 455 a low-foam semisynthetic, microemulsion coolant that is optimized for the high-volume cast iron, ferrous, and some aluminum and nonferrous metalworking operations. MicroSol 455 prevents leaching of elemental iron and eliminates clinkering and oxidation of ferrous microfines.

“Customers switching to MicroSol 455 will see lower cost of operations due to its machining performance and long sump life”, said Ahmed Tahir, Global VP of Strategy and Marketing. He added, “In addition, MicroSol 455 represents a new generation of products designed to reduce regulatory compliance burden for our global customers with its compliance to all major registries”.

In conjunction with IMTS, Master Fluid Solutions is offering a \$799 plus shipping and handling, per drum special launch price good from September 1, 2018 to December 31, 2018 on the new TRIM MicroSol 455. “Our customers who regularly machine high volumes of cast iron will be particularly excited about MicroSol 455 because in addition to its superior performance, it also provides extended sump life delivering benefits to the bottom line. And with our special introductory pricing, it is an especially cost-effective solution for our customers,” stated Rob Dodson, Product Manager, Master Fluid Solutions.

MicroSol 455 also provides superior corrosion inhibition on cast iron and eliminates “hot chips” and clinkering problems. Additionally, it keeps machines clean while leaving a soft fluid film for ease of cleaning and reduced maintenance. MicroSol 455 requires no special disposal or recycling.

About Master Fluid Solutions — Master Fluid Solutions, working closely with the worldwide metalworking community, develops and markets a full line of environmentally sound, extremely durable and stable cutting and grinding fluids, straight oils, parts cleaners, and rust preventives under the TRIM® and Master STAGES™ brands. Master Fluid Solutions’ XYBEX® fluid management systems lower their customers’ total cost of operations. Master Fluid Solutions is committed to the safety of the people who use their products, the protection of the planet, and the overall impact on their customers’ profitability. Master Fluid Solutions is proud to have been named #1 in “Top Workplaces” in the Toledo, OH area for 2017.
