MASTER CHEMICAL INTRODUCES TRIM® E906, A PREMIUM LONG LIFE, LOW FOAM EMULSION

Perrysburg, Ohio September 19, 2008—Master Chemical Corporation announces the introduction of a new premium low foaming emulsion, TRIM® E906. This low foaming formula delivers consistent machining and grinding performance on a wide range of materials and applications. “E906 provides the newest available technology into our proven emulsion-based cutting platform,” stated Global Marketing Manager, David A. Barned. The stable and predictable performance of E906 makes it a first choice for manufacturers doing work for industries as diverse as aerospace, automotive, energy, and specialty job shops. Using E906 on the newest CNC machine tools that utilize high-pressure, high-volume, through-the-tool coolant systems will help plants maximize their productivity.

E906 provides a much longer operational life without the need for costly additives than competitive fluids. E906 is effective in a wide range of operations from production surface and centerless grinding to heavy-duty broaching, gear hobbing, surface, pocket, and thread milling. “In high-speed turning and milling, E906 has the right balance of cooling and lubrication to provide great tool life and surface finishes because it has a tight emulsion which reduces carryoff and gets the fluid to the point of cut,” stated Mr. Barned. E906 also protects machine tool surfaces while preventing sticky ways, chucks, tool holders, and fixtures. E906 does not contain or test positive for phenol, is easily removed with water, working solution, or TRIM® CLEAN aqueous cleaners. E906 is easy to recycle or dispose of with conventional techniques and equipment.

About Master Chemical Corporation

Master Chemical Corporation was founded on November 13, 1951. Since then, working closely with the worldwide metalworking community, Master Chemical Corporation has developed and marketed a full line of specialty cutting and grinding fluids, cutting oils, concentrated washing and cleaning compounds, and rust preventives all under the TRIM Brand trademark. These products are both environmentally sound and when used in conjunction with Master Chemical's XYBEX® Coolant Recycling and Filtration Systems, are the most durable and stable products available anywhere today. Master Chemical has always been committed to the safety of the people who use our products, the protection of our planet and the environment we live in, and the overall impact on our customers' profitability. Master Chemical serves customers globally. For further information, please contact a local Distributor near you <http://www.2trim.us/distributors.php>, call us at 419-874-7902, or visit our website at www.masterchemical.com.
